

F Detailed prompt templates

Table 5 contains the full prompt templates we used for the main evaluation and Table 7 contains the extra prompt templates.

Table 5: *Ranking prompt templates*. The six templates we wrap the test examples in to present to the models. Template 1, 3, and 4 are of the type *structured*, and 2, 5, and 6 of the type *natural*. Within the type of prompt template they only differ slightly in wording.

#	Prompt template
1	Does the following response to the question imply yes or no? question: <utterance> response: <response> implicature: <implicature>
2	Finish the following text: Esther asked "<utterance>" and Juan responded "<response>", which means <implicature>
3	Is the implied meaning of the following response yes or no: question: <utterance> response: <response> meaning: <implicature>
4	What is the intent of the following response, yes or no? question: <utterance> response: <response> intent: <implicature>
5	Finish the following text: Karen asked "<utterance>" and William responded "<response>", which means <implicature>
6	Finish the following text: Bob asked "<utterance>" and Alice responded "<response>", which means <implicature>

Table 6: *Completion prompt templates*. The six adjusted templates we wrap the test examples in to present to the models when we use completion instead of likelihood ranking. Template 1, 3, and 4 are of the type *structured*, and 2, 5, and 6 of the type *natural*. Within the type of prompt template they only differ slightly in wording.

#	Prompt template
1	Does the following response to the question imply yes or no? Only output ‘yes’ or ‘no’. Even if you’re uncertain, choose either ‘yes’ or ‘no’. question: <utterance> response: <response> implicature: <implicature>
2	Finish the following text. Only output ‘yes’ or ‘no’. Even if you’re uncertain, choose either ‘yes’ or ‘no’. Esther asked "<utterance>" and Juan responded "<response>", which means <implicature>
3	Is the implied meaning of the following response yes or no. Only output ‘yes’ or ‘no’. Even if you’re uncertain, choose either ‘yes’ or ‘no’. question: <utterance> response: <response> meaning: <implicature>
4	What is the intent of the following response, yes or no? Only output ‘yes’ or ‘no’. Even if you’re uncertain, choose either ‘yes’ or ‘no’. question: <utterance> response: <response> intent: <implicature>
5	Finish the following text. Only output ‘yes’ or ‘no’. Even if you’re uncertain, choose either ‘yes’ or ‘no’. Karen asked "<utterance>" and William responded "<response>", which means <implicature>
6	Finish the following text. Only output ‘yes’ or ‘no’. Even if you’re uncertain, choose either ‘yes’ or ‘no’. Bob asked "<utterance>" and Alice responded "<response>", which means <implicature>

Table 7: The three additional templates we wrap the test examples in to present to the models, adapted from Glaese et al. (2022).

#	Prompt template
7	The following text shows an interaction between two humans called Esther and Juan. In the interaction, Esther will ask Juan a question, and Juan will give an answer that contains an implicature. An implicature is an utterance that means something other than the literal meaning of the words. The implicature of Juan’s response is yes or no. You, the AI assistant, are asked to finish the text with yes or no. The task begins: Esther asked "<utterance>" and Juan responded "<response>", which means <implicature>
8	The following text shows an interaction between two humans called Esther and Juan. In the interaction, Esther will ask Juan a question, and Juan will give an answer that has a meaning besides the literal meaning of the words. That meaning is either yes or no. You, the AI assistant, are asked to finish the text with the correct meaning, either yes or no. The task begins: Esther asked "<utterance>" and Juan responded "<response>", which means <implicature>
9	The following text shows an interaction between two humans called Esther and Juan. In the interaction, Esther will ask Juan a question, and Juan will give an answer that has a meaning besides the literal meaning of the words. That meaning is either yes or no. You, a highly intelligent and knowledgeable AI assistant, are asked to finish the text with the correct meaning, either yes or no. The task begins: Esther asked "<utterance>" and Juan responded "<response>", which means <implicature>
